Leverage the Network, **Claim Your Rewards**

Stop leaving money on the table. Build your pack, expand your reach, and let the profits flow. The deeper your network, the greater your earning power.

Lunar Wolf allows you to earn profits through your network in 2 ways:

1. Profit Sharing
2. IB Income

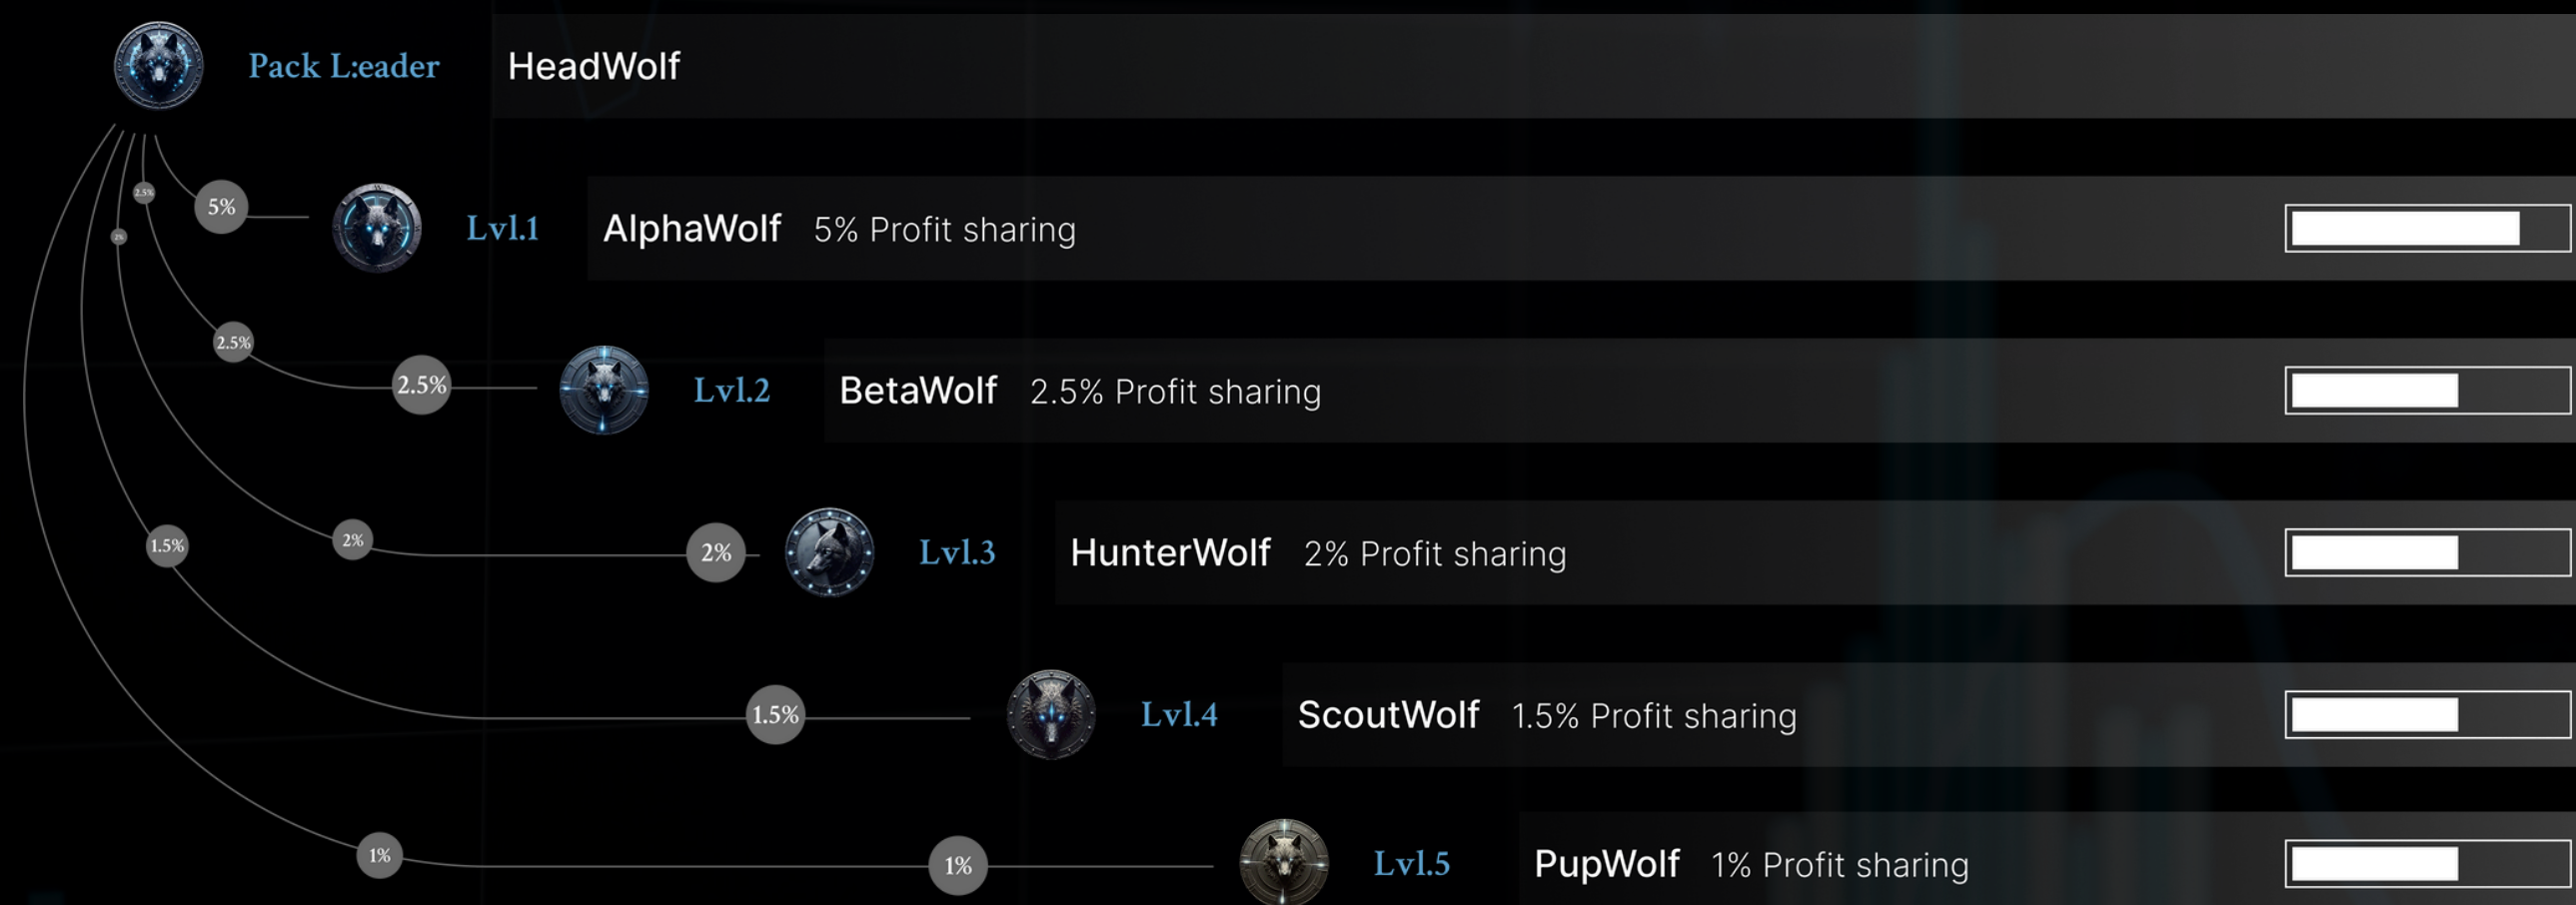

1. PROFIT SHARING

Profit Sharing model allows you to **earn a percentage from the profit** of your referrals. This goes strong upto 5 levels of referrals.

Profit Sharing Breakdown Chart

Visualize your earnings at each level with detailed profit sharing percentages. This chart clearly shows how profits flow from direct referrals (5%) down to the fifth level (1%). Understand your earning potential and track rewards easily across all levels.

LEVEL 1

When you refer a trader in your network, you get a default of 5% from their profit. The profit multiplies with number of people you add to your network.

LEVEL 2

When traders from Level 1 add more traders to their network, they form Level 2.

Let's say there are 5 traders in Level 1, each of them adding 2 people each to their referral. This creates a total of 10 traders in Level 2.

You have a chance of winning 2.5% profit from each of these when the trading amount of YOU + LEVEL 1 reaches 50K or more.

The same cycle repeats **UPTO LEVEL 5**, Here are the numbers:

Level 1: 5% (Default)

Level 2: 2.5% (min 50K account bal of YOU + LEVEL 1)

Level 3: 2% (min 100K account bal of YOU + LEVEL 1)

Level 4: 1.5% (min 200K account bal of YOU + LEVEL 1)

Level 5: 1% (min 300K account bal of YOU + LEVEL 1)

2. IB INCOME

The IB Network rewards you with **fixed commissions** for every trader you refer, with earnings extending up to 5 levels. As your pack grows, you unlock higher ranks and bigger commissions per account.

Lunar Wolf IB Program
